

PRE-CONGRESS WORKSHOPS

ONE DAY WORKSHOP

FRIDAY, 10 OCTOBER 2025

ALLERGY IMMUNOLOGY AND RHEUMATOLOGY

Primary Immunodeficiency Course 101

Description Primary immunodeficiency (PID) is a heterogeneous group of genetic diseases that weaken one or more components of the immune system. There are still significant challenges related to the availability of diagnostic tests, as well as limited knowledge and awareness among healthcare providers about PID in Indonesia. This course is likely to pose challenges for recognizing, early warning signs, type of PID, diagnosis and management of PID.

Participant Pediatrician and General Practitioner

Date 10 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 80 participants

ONE DAY WORKSHOP

FRIDAY, 10 OCTOBER 2025

CARDIOLOGY

Current Perspective of Rheumatic Fever and Rheumatic Heart Disease in the Pediatric Population: From Throat or Skin to Heart

Description This workshop provides an updated overview of Rheumatic Fever (RF) and Rheumatic Heart Disease (RHD) in children, emphasizing the evolving understanding of their pathogenesis, particularly the role of streptococcal infections from both the throat and skin. Participants will explore current diagnostic challenges, prevention strategies, and treatment approaches, with insights into global and regional trends. The session aims to enhance clinical awareness and early intervention efforts to reduce the burden of RHD in pediatric populations.

Participant Pediatrician and General Practitioner

Date 10 October 2025

Time 07.00-17.00

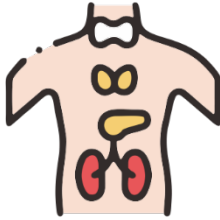

Location Harris Hotel and Conventions Malang

Quota 80 participants

ONE DAY WORKSHOP
FRIDAY, 10 OCTOBER 2025

ENDOCRINOLOGY

Optimizing Growth in Children and Adolescents: From Detection to Management of Growth Disorders

Description Growth and puberty in children and adolescents are among the most common concerns raised by parents in daily practice. In-depth understanding of normal growth physiology, accurate interpretation of growth patterns using charts, recognition of key signs and symptoms, and comprehensive treatment strategies are essential for pediatricians in evaluating and managing growth disorders.

Participant Pediatrician and General Practitioner

Date 10 October 2025

Time 07.00-17.00

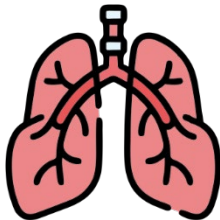

Location Harris Hotel and Conventions Malang

Quota 60 participants

ONE DAY WORKSHOP
FRIDAY, 10 OCTOBER 2025

RESPIROLOGY

Expanding Management of Drug-Sensitive and Drug-Resistant Tuberculosis

Description Tuberculosis (TB) remains a significant global health challenge, especially in children. With the rising prevalence of drug-resistant TB, pediatricians must be equipped with updated knowledge and skills to recognize, diagnose, and manage both drug-sensitive and drug-resistant TB effectively. This workshop provides a comprehensive update on TB diagnosis, treatment regimens, monitoring, and approaches to prevent transmission, especially in high-risk pediatric populations.

Participant Pediatrician

Date 10 October 2025

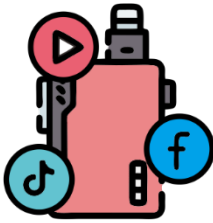

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 60 participants

ONE DAY WORKSHOP
FRIDAY, 10 OCTOBER 2025
ADOLESCENT HEALTH

Comprehensive Approach to Adolescent Health For Ensuring The Sustainability of Future Generation

Description This workshop is designed to build a deeper understanding of adolescent health as a foundation for long-term population well-being. The program provides up-to-date insights into adolescent health trends, standards of care, and the growing burden of infectious diseases in this age group. Participants will also explore endocrine screening in adolescents, including clinical indications for referral. Through a multidisciplinary and evidence-based approach, this training aims to equip pediatricians with the tools to deliver holistic and sustainable healthcare for adolescents.

Participant Pediatrician and General Practitioner

Date 10 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 50 participants

ONE DAY WORKSHOP
FRIDAY, 10 OCTOBER 2025
ENVIRONMENTAL HEALTH AND CLIMATE CHANGE

Protecting Young Lives: Enhancing Awareness of the Dangers of Tobacco for Children from Intrauterine to Adolescence

Description The workshop aims to increase knowledge and awareness of the impact of tobacco and cigarette smoke on children from fetuses to adolescents, as well as strategies for handling them

Participant Pediatrician and General Practitioner

Date 10 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 60 participants

ONE DAY WORKSHOP
FRIDAY, 10 OCTOBER 2025
HIV

Pediatric HIV Course - Towards Better Quality of Care

Description Each year in Indonesia, approximately 2,500 children are newly diagnosed with HIV. To ensure high-quality care, healthcare providers need comprehensive knowledge and skills. Join this course to access the latest evidence and best practices in pediatric HIV management.

Participant This workshop is designed for pediatricians and physicians involved in the care of children living with HIV.

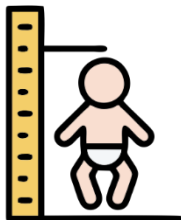

Date 10 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 50 participants

ONE DAY WORKSHOP
FRIDAY, 10 OCTOBER 2025
STUNTING

Stunting Comprehensive Training and Workshop

Description The role of pediatricians is to conduct further diagnosis with stunting and red-flag evaluations. Providing intervention using Special Medical Needs Processed Food (PKMK) if red-flags and stunting diagnoses are found. After that, the child's condition needs to be monitored together by all parties. This process involving various health workers is at the forefront of handling stunting. Therefore, pediatricians need to be equipped with competencies in the process of managing stunting patients, starting from early detection to further therapy through a referral system.

The "Stunting Comprehensive Training and Workshop" activity aims to better understand the management of stunting and tiered referrals, can be implemented according to the conditions of regional hospitals, especially each pediatrician. Moreover, participants can share experiences and strategies together to overcome the challenges of reducing stunting rates faced in Indonesia.

Participant Pediatrician

Date 10 October 2025

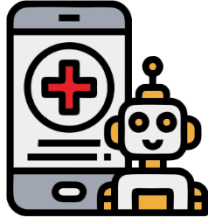

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 100 participants

PRACTICE SESSION
FRIDAY, 10 OCTOBER 2025
ARTIFICIAL INTELLIGENCE

Pediatric Artificial Intelligence For Beginners

Description Artificial Intelligence (AI) technology has been proven to help medical personnel in various aspects, including in the creation of educational content, medical chatbots, automatic medical record recording, and data-based disease pattern analysis. With this workshop, participants are expected to be able to understand prompting techniques in order to optimally utilize AI and also an understanding of how AI can be applied in daily practice safely and effectively.

Participant Pediatrician and General Practitioner

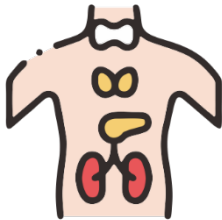

Date 10 October 2025

Time 18.00–22.00

Location Harris Hotel and Conventions Malang

Quota 150 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
ENDOCRINOLOGY

Navigating Problems of Puberty in Daily Practice: Recent Updates in Diagnosis and Management

Description Growth and puberty in children and adolescents are among the most common concerns raised by parents in daily practice. In-depth understanding of normal physiology of puberty, accurate assessment and interpretation using Tanner stage, recognition of key signs and symptoms, and comprehensive treatment strategies are essential for pediatricians in evaluating and managing pubertal disorders.

Participant Pediatrician and General Practitioner

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025

INFECTIOUS AND TROPICAL DISEASES

Common Congenital Infections: From Early Diagnosis to Comprehensive Treatment

Description Congenital infections affect more than 70% child bearing women, unfortunately they are not easy to be detected during early of life and contribute to long term morbidity and disabilities including intrauterine growth restriction, neurodevelopmental impairment, sensory deficits, and, in severe cases, fetal death. By focusing on both early detection, complete and newest management/treatment plans for each disease we can advance toward optimizing outcomes and enhancing the quality of life for children born with congenital infections.

Participant Pediatrician

Date 11 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 80 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
PEDIATRIC IMAGING

Upper Respiratory Airways, Thorax/Lung Ultrasound and Chest X-Ray

Description Upper respiratory airways, thorax/lung ultrasound and chest x-Ray play an important role in emergency setting to establish diagnosis, prompt treatment and follow up management. Knowledge, skill and interpretation's capability in these fields may help reducing child's morbidity and mortality rates.

Participant Pediatrician and General Practitioner

Date 11 October 2025

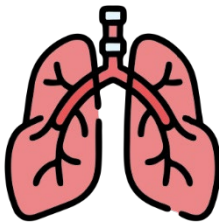

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 60 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
RESPIROLOGY

Comprehensive Approach In Managing Pneumonia and Its Complications

Description Pneumonia continues to be a leading cause of morbidity and mortality among children. Beyond the acute phase, complications such as empyema, necrotizing pneumonia, or chronic respiratory issues may occur. This full-day workshop aims to provide pediatricians with a structured and evidence-based approach to the diagnosis, management, and follow-up of pediatric pneumonia and its complications

Participant Pediatrician

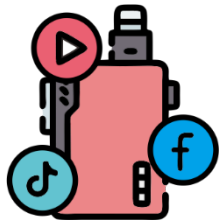

Date 11 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
ADOLESCENT HEALTH

Integrated Management of Common Adolescent Health Problems

Description This workshop is designed to enhance their clinical skills in addressing common adolescent health challenges. The training will focus on practical approaches to adolescent health problems, including early identification and effective management strategies.

Participant Pediatrician and General Practitioner

Date 11 October 2025

Time 07.00-17.00

Location Harris Hotel and Conventions Malang

Quota 50 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
BREASTFEEDING

The Science of Breastfeeding: Addressing Concern and The Role of Exclusive Pumping vs Direct Breastfeeding

Description Breastfeeding remains a cornerstone of early childhood nutrition, offering optimal health benefits for both infants and mothers. However, despite strong global recommendations, breastfeeding practices are often challenged by a variety of medical, cultural, psychological, and logistical concerns. With the rise in awareness of alternative feeding strategies, such as exclusive pumping, healthcare professionals and parents alike are seeking evidence-based guidance to make informed decisions that support both infant well-being and maternal health.

Participant Pediatrician
Date 11 October 2025
Time 07.00-17.00
Location Harris Hotel and Conventions Malang
Quota 50 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
IMMUNIZATION

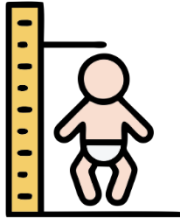

Vaccinology Training

Description Vaccination is the best preventive measure in overcoming infectious diseases in children and infants, to reduce morbidity and mortality. Efforts to strengthen pediatricians' understanding of immunization can be done through training on correct and appropriate vaccination. For this reason, Vaccinology Training (VT) is needed for pediatricians throughout Indonesia. With the implementation of VT at PIT Malang, it is hoped that pediatricians who attend and participate in the training can improve their understanding and ability in providing services to their patients more optimally.

Participant Pediatrician

Location Harris Hotel and Conventions Malang
Quota 60 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
STUNTING

Guidelines to Prevent and Treat Stunting for LBW Babies

Description Children with a history of premature birth are at risk for growth and development disorders. Proper nutrition is essential for the growth and development of premature babies. The purpose of providing nutrition to premature babies is to meet the growth rate of healthy fetuses at the same gestational age, and to produce the same body composition as healthy fetuses, including cell structure and number, concentration of tissue and blood nutrients, and developmental outcomes. Therefore, this workshop was held to prevent stunting through comprehensive early nutritional management in premature babies.

Participant Pediatrician

Date 11 October 2025

Time 07.00–17.00

Location Harris Hotel and Conventions Malang

Quota 100 participants

ONE DAY WORKSHOP
SATURDAY, 11 OCTOBER 2025
INDONESIAN COLLEGE OF PEDIATRICS

Empowering Lecturer Through Faculty Development

Description The Indonesian Pediatrics College (KIKAI) initiated a workshop specifically designed to improve the teaching capacity of IKA Sp1 and Sp2 staff. This workshop will cover fundamental topics in clinical education, such as teaching principles in clinical settings, clinical reasoning, micro-skill teaching, Workplace-Based Assessment (WPBA), and strategies for providing constructive feedback to students. These topics were selected based on real needs in the field and direct relevance to student supervision and evaluation activities.

Participant Pediatrician

Date 11 October 2025

Time 07.00–17.00

Location Grand Mercure Malang Mirama

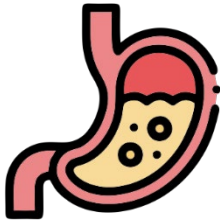

Quota 40 participants

TWO DAY WORKSHOP
FRIDAY-SATURDAY, 10-11 OCTOBER

GASTROENTEROLOGY & HEPATOLOGY

DGBI (Nausea-Vomiting, Abdominal Pain and Defecation Disorder) from Infant to Adolescent with Environmental Changes

Description Environmental and Climate Changes in Post Pandemic Era cause a huge impact in pediatric group age with the increasing number of DGBI cases. DGBI that consist of Nausea - Vomiting group, Abdominal Pain group and Defecation Disorder Group in all group age from infant to adolescent according to Rome IV Criteria will be discussed in this workshop from the background science and philosophy to the clinical implementation in daily practice.

Participant Pediatrician and General Practitioner

Date 10-11 October 2025

Time 07.00-17.00
